

ASTROPHYSIK (WS 2025/2026)

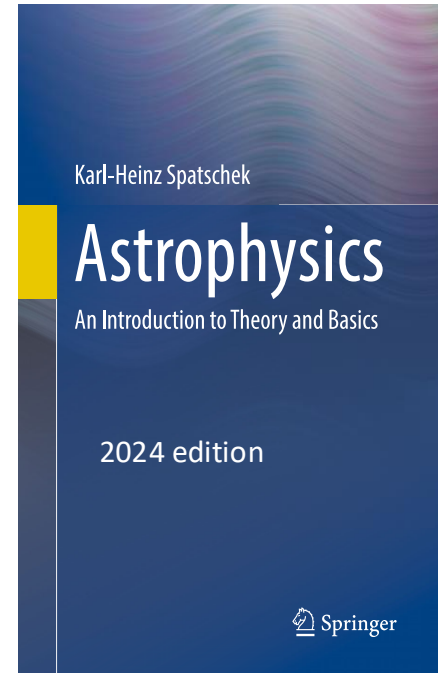

- PART I* *Classical Astrophysical Models*
PART II *Crash Course in General Relativity*
PART III *GR effects, Cosmological models*

Compared to previous lectures, greater emphasis is placed on relativistic effects and recent developments in cosmology.

Materials for each lecture and exercise will be made available on ILIAS in a timely manner. The entire module is worth 6 ECTS credit points

Lecture will be given in English (if desired).
